

## BRILLIANT PM<sup>PRO</sup>

The international hotel industry is constantly looking for improvements. Hotel owners are, rightfully, becoming more and more demanding when it comes to computer automation for their properties.

Our reply to this demand is our Brilliant PM<sup>PRO</sup> front desk software. It has become the heart of all our software products. The Brilliant PM<sup>PRO</sup> system is feature rich; components that are normally optional or nonexistent in other PM systems are standard in Brilliant. Quarterly updates are developed based on changes in the hotel market and requests from our valued customers.

### Features:

- **User interface**

Multilingual, tool bar for visual system navigation, drag and drop usage of the mouse, multiple user designated data fields in reservation and guest information databases, one-button night audit procedure, multiple security levels with user-created function control

- **Integration**

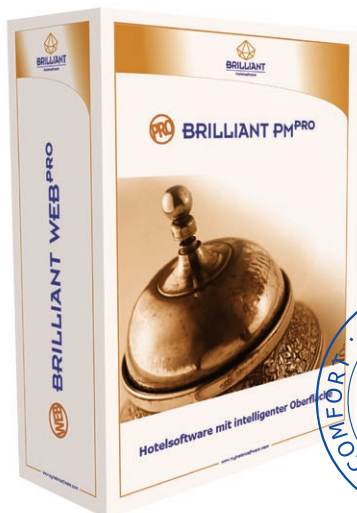

Complete integration with Microsoft® Office™ with direct connection to Outlook, Word and Excel

- **Interfaces**

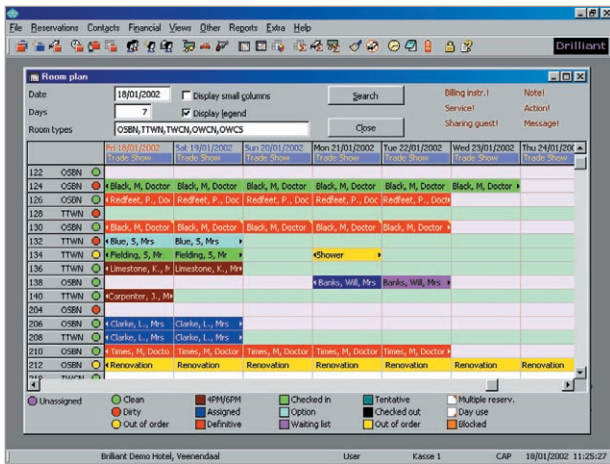

to all major vendors!

- **Optional modules**

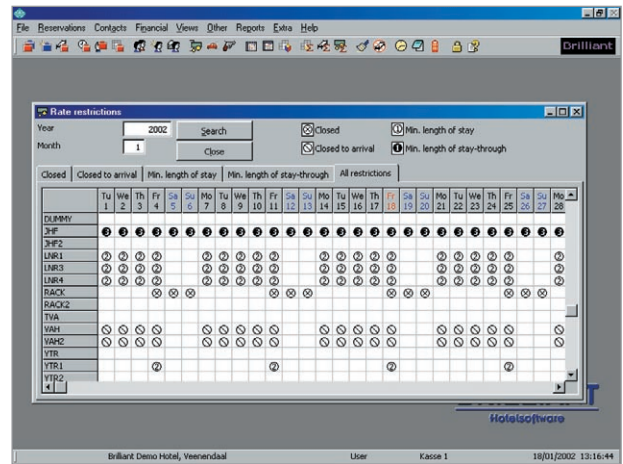

Sales & Banqueting, Leisure

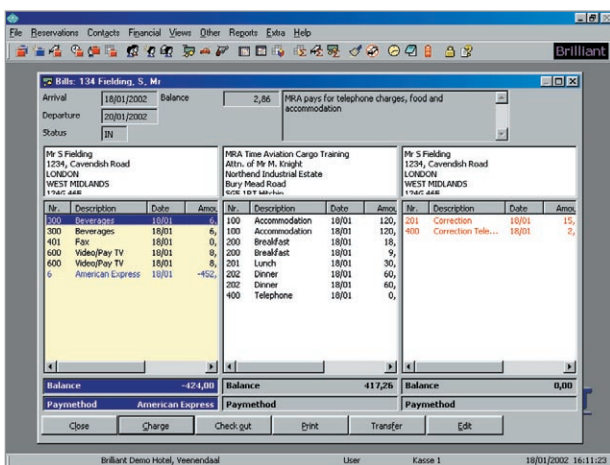

**Your total solution starts here!  
Simply Brilliant.**

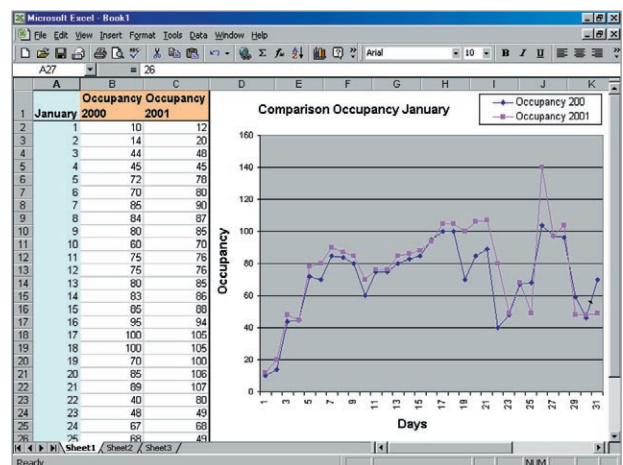

The Room rack can be used as the centre of your work area. It can be configured to use different colors and is free definable. Of course you can drag & drop within the Room rack.

In the Rate Manager you have a clear view of all rate restrictions per day of the week. Use effectively to increase revenue.

Invoicing has never been easier. With a default of 3 invoices per guest you can drag & drop charges between them.

Graphics will help you analyze your forecast, current and historic data.
